

EDUCATION

Stony Brook University

Stony Brook, NY

May 2030

- B.S. Candidate in Computer Science | Sophomore Standing
- Honors College | Honors in Computer Science Program

Stuyvesant High School

New York, NY

GPA: 97.64/100

- Excellence in Mathematics Award
- Clubs: Stuyvesant Math Team, Mu Alpha Theta Math Honor Society, Spectator / Indicator Photos
- Relevant Coursework: AP Physics C (Mech & E/M), AP Calculus BC, Linear Algebra, Cybersecurity

EXPERIENCE

Memorial Sloan Kettering Cancer Center

New York, NY

Student Intern, Medical Physics

May 2025 - November 2025

- Trained and improved a CNN-based deformable image registration model for aligning cone-beam CT scans to planning CTs for lung cancer treatment monitoring with validation DICE score over 0.75
- Experimented with a multi-head attention architecture for DIR, achieving parity with CNN and VoxelMorph baselines
- Wrote MATLAB and Python preprocessing and testing code used for preparing training datasets
- Ran training and inference on HPC clusters and configured CUDA environments for training compatibility

Summer Intern

July 2024 - August 2024

- Wrote C# and Python preprocessing code for head/neck cancer CT segmentation training for treatment tracking
- Leveraged HPC clusters and IBM LSF (bsub) for job scheduling

Hack Club

Shelburne, VT and Remote

Logistics and Hardware Engineering Intern

July 2021 - March 2024

- Built a mailing address database with USPS IMb, enabling no-cost letter tracking and commercial postage
- Reduced domestic shipping costs by up to 60% and international shipping costs by up to 80%
- Mentored dozens of high school students through first-time PCB design reviews
- Designed open-source 2D CNC motor control board, USB-C Power Delivery sink, and handheld gaming console
- Published open-source reference designs and documentation for NFC tags and USB hubs
- Managed the manufacture and global mailing of 800+ hardware kits

PROJECTS

Personal Site and Photography Portfolio | Next.js, Tailwind CSS, Cloudinary CDN | [GitHub](#) 2026

- Designed a performant static site using Next.js, Tailwind CSS, and Vercel, featuring EXIF metadata rendering and flexible category / collection filtering
- Implemented an authenticated administrator dashboard with NextAuth and Bcrypt, using Cloudinary CDN for dynamic asset delivery and a Supabase PostgreSQL backend via custom API wrappers

Component Inventory Manager | Next.js, PostgreSQL (Supabase), NextAuth | [GitHub](#) 2026

- Created a full-stack inventory tracking system using Next.js and Supabase PostgreSQL to manage electronic components, manufacturer MPNs, distributor data, and generate asset ID labels
- Built API wrappers to query, create, and update electronic components by MPN, description, and category

AWARDS & HONORS

- AIME Qualifier (3x)
- CEMC Euclid/Fermat School Winner (2025)
- Gold President's Volunteer Service Award

SKILLS

Languages: C, C++, Python, MATLAB, C#, Java**Frameworks:** Next.js, HTML/CSS, Supabase**Tools:** Git, Linux, KiCAD, LaTeX
